Robin Rajesh

Full Stack Engineer · AI & LLM Applications

+91 83695 00694 | robin.trajesh@gmail.com | linkedin.com/in/robinrajesh | github.com/Robin-Rajesh | robin-rajesh.github.io/portfolio

PROFILE

Full Stack Engineer at Worldline with an M.Sc. in Artificial Intelligence and Machine Learning. Experienced in building and deploying end-to-end AI applications, from LLM, RAG and agentic backends in Python and FastAPI to React and TypeScript front ends. Passionate about turning machine learning into reliable products that solve real-world problems.

EXPERIENCE

Full Stack Engineer 2026 – Present

Worldline

- Building and maintaining full-stack features across backend services and web front ends.
- Applying GenAI experience from the Worldline internship to production engineering work.

Associate Software Developer January 2026 – 2026

Sysfore Technologies, On-Site

- Engineered scalable enterprise AI applications in Python, using LangChain and FastAPI to integrate LLMs into production environments.
- Architected Retrieval-Augmented Generation (RAG) pipelines for intelligent document analysis and data extraction, streamlining internal workflow automation.
- Developed AI-driven SQL query builders that translate natural-language prompts into optimised database queries for advanced analytics.
- Designed backend infrastructure on PostgreSQL and Supabase for secure, high-performance data management.
- Built responsive interfaces for enterprise AI solutions, bridging complex backend logic with intuitive user experiences.

GenAI Intern October 2025 – December 2025

Worldline ePayments India Private Limited, Remote

- Developed an AI-powered Contract De-Risking System with a FastAPI backend and React (Vite) frontend.
- Integrated local LLM inference using Ollama for offline AI-driven contract risk analysis.
- Implemented contract upload and analysis, policy compliance checking, an AI contract chat assistant and an analysis dashboard.
- Built scalable APIs for document processing, risk assessment and interactive contract querying.

GenAI Intern April 2025 – June 2025

UIAI Technologies, Remote

- Developed an agentic RAG system using LangChain and Agno with persistent chat history in MongoDB.
- Built a Streamlit app for real-time resume–job analysis using vector embeddings and LLM relevance scoring.
- Implemented document chunking, metadata tagging and cosine-similarity search for enhanced semantic matching.
- Designed and deployed the HiRe web platform with a Flask backend for candidate management and secure data storage.

EDUCATION

CHRIST (Deemed to be University) Bangalore, Karnataka

M.Sc. in Artificial Intelligence and Machine Learning June 2024 – April 2026

St. Xavier's College (Autonomous) Mumbai, Maharashtra

B.Sc. in Information Technology June 2021 – May 2024

PROJECTS

Pact Protect – AI Contract De-Risking | React, TypeScript, FastAPI, LangChain, Qdrant, Ollama/Groq, Tesseract

- Clause-level risk rating, configurable policy engine, RAG over similar clauses, OCR for scanned PDFs and safer-wording suggestions.

Enterprise AI Data Analytics Portal | Python, LangChain, Gemini Pro, FastAPI, React, Supabase

- Agentic analytics platform translating natural language into complex SQL queries and actionable business insights.
- RAG pipeline to semantically search unstructured corporate policy documents; Supabase PostgreSQL with transaction pooling.
- Fault-tolerant React frontend with Plotly.js visualisations, dynamic data grids and scheduled executive reports.

GenEWA – AI-Powered Study Assistant | React, TypeScript, TailwindCSS, Node.js, Supabase, Groq API, MCP

- Study assistant for Indian college students using MCP for context sharing across chat, budgeting and scheduling modules.
- Groq Llama-3.3-70B for real-time academic chat and summarisation; JWT auth and analytics dashboard.

10 Days of AI Voice Agents (murf.ai challenge) | LiveKit, Murf Falcon TTS, Deepgram, Gemini

- Built ten real-time voice agents in ten days, including ordering, sales, fraud-alert, tutoring and game-master agents.

HiRe – AI-Driven Recruitment Platform | Python, Streamlit, Flask, MongoDB, Agno

- Agentic candidate–job matching using LLM retrieval agents over vector embeddings, with persistent candidate profiles.

ACHIEVEMENTS

1st Prize – National-Level Datathon, SRM University: won against 25+ teams with an ML forecasting system at 90%+ accuracy, deployed via a Streamlit dashboard.

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript, TypeScript, Java
Full Stack: FastAPI, Flask, Node.js, React, Vite, TailwindCSS, Streamlit
GenAI & LLMs: LangChain, Agno, RAG, MCP, Prompt Engineering, Ollama, Groq, Gemini
Machine Learning & Deep Learning: Scikit-learn, XGBoost, TensorFlow, PyTorch, Hugging Face
Data Analysis: Pandas, NumPy, Matplotlib, Seaborn, Plotly
Databases: PostgreSQL, Supabase, MongoDB, Firebase, MySQL, Qdrant, ChromaDB
Tools: Git, Docker, VS Code, Google Colab, AWS

LEADERSHIP

Class Representative, PG Second Year – CHRIST University · Committee Head, Revelations Intercollegiate Fest – CHRIST University · Sports Coordinator, Kalyan Marthoma Youth Committee 2022–23 · Technical Team, Malhar Fest – St. Xavier's College
